OSA-4607-63

28 AUG 1963

MEMORANDUM FOR: Deputy for Field Activities/OSA

SUBJECT : Authorized Headquarters Positions

1. Attached is a listing of all positions in the Field Activities Group showing current incumbent, specialty code, grade of the position, position number, and any nominees processing against current vacancies. The line item "Manning Objective" shows the positions that were requested by OSA but disapproved (at this time) by the DCI.

2. You will note that there are three requisitions in excess of your current authorized staffing complement for the Operations Division. An actual or anticipated overage in one of your divisions can be balanced against a shortage in another division. However, any changes in your manning need to be considered in relation to the total authorized manning strength for the Field Activities Group. Utilization of the total number of personnel authorized for your group is certainly a prerogative you exercise as a Line Commander. The formal piece of paper attached tends to reflect what was, not what is or will be.

3. I will be glad to discuss the Field Activities Group staffing complement any time at your convenience.
